DETAILED ACTION

1. The amendment filed June 21, 2004 has been entered.

Allowable Subject Matter

2. The indicated allowability of claim 16 is withdrawn in view of the newly discovered reference(s) to Wu et al (6,221,747 B1). Rejections based on the newly cited reference(s) follow.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claim 16 is rejected under 35 U.S.C. 102(a) as being anticipated by Wu et al (6,221,747 B1).

3. Regarding claim 16, Wu et al discloses a method of making a semiconductor device (i.e. “integrated circuit” per abstract) comprising: forming a conductive layer (101) on a substrate (100) (i.e. conductive layer 101 that can be “a wiring line” per col. 2, line 66); forming a dielectric layer (102) on the conductive layer (101); etching a via (104) through the dielectric layer (102), the via (104) being located above a portion of the conductive layer (101); and introducing a dopant into *that portion of the conductive layer* exposed by the via (col. 3, particularly lines 42-47 wherein, per Fig. 1B, dopant diffusion into the substrate (100) necessarily requires dopants to be introduced into the conductive layer (101).

Art Unit: 2829

Allowable Subject Matter

4. Claims 17-20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
